

What is claimed is:

1. A dishwasher comprising:

a main body having generally a box shape with an open
5 front;

a washer tub being extracted from and retracted into
the main body through the open front by means of slide rail
assemblies, the washer tub having an open top;

10 a lid being located at an upper part of the main body
when the washer tub is fully extracted and being moved
downward as the washer tub is retracted, the lid closing the
open top of the washer tub when the washer tub is fully
retracted to be accommodated in the main body; and

15 an extension member extending backward from a top rear
portion of the washer tub,

wherein, when the washer tub is fully extracted from
the main body, a rear end of an inner wall of the washer tub
is located in front of a front end of the main body and a
free end of the extension member is placed under the lid.

20

2. The dishwasher of claim 1, wherein the extension
member has a plate shape.
